COLOR YOUR FEELINGS

EMOTIONS CONTAINED IN THE CHOICE OF A COLOUR

Colour, emotion and performance for decorative surface finishes.

Surface coverings, whether in stoneware, natural stone or other material finishes, are decisive in architectural design and modern interior design. Spaces are characterised by the surfaces and elements that compose them, horizontal and vertical planes that convey different perceptions depending on chromatic gradation, textures, dimensions, formats.

PERFORMANCE / DECORATION

FugaStyle is the decorative grouts selection for all aesthetic and performance requirements in the world of surfaces.

Architectural and decorative choices are enhanced by material details on floors and walls.

The joints grout maintains technical performance connecting surfaces, expressing a new aesthetic function, integrated into the design choices and derived from emotions.

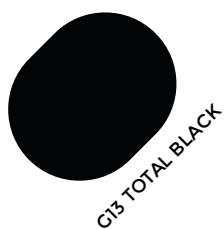

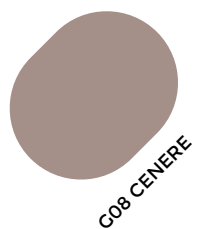

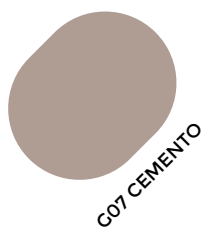

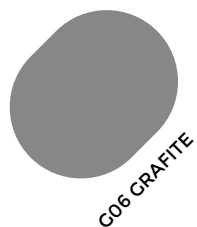

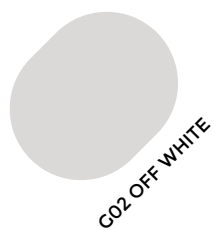

COLOR YOUR FEELINGS

FugaStyle palette is divided into 5 MOODS characterised by emotions - feelings - which arise from the visual and sensory perceptions of each of us, to offer tone-on-tone and contrasting combinations with countless possibilities in the choice of floor and wall coverings, creating combinations that highlight details and enhance the uniqueness of spaces.

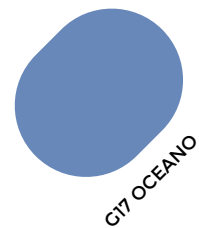

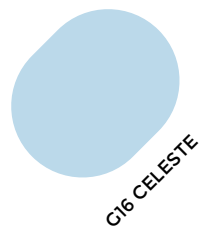

A wide range of colours allows for continuity and colour balance between surfaces and finishes, to find the perfect match in every project. 42 modern and distinctive shades, ranging from neutral tones to the most intense colours.

The uniqueness of a design project is enhanced by the decorative details, the choice is dictated by the emotion which is maintained and reproduced in the work realised, with elegant combinations of tone, chromatic continuity or abrupt interruptions giving freshness and dynamism to an environment to express homogeneity of aesthetic content, making each space a work of value.

PRIDE

Amidst a wide selection of cool colours, PRIDE stands out. PRIDE is a reminder of classicism and shades that will never go out of fashion.

From pure white snow to mountain sidereal grey, each hue brings with it a feeling of power and determination.

Dark colours can be the ideal solution to achieve a visually striking and elegant effect with a touch of sophistication and modernity, creating a strong contrast to the cladding and enhancing the overall design.

SERENITY

Nature gives us a variety of colours that evoke serenity and inner peace. SERENITY combines a world of hues, from the delicate tones of meadow green to the pastel shades of the sky, from the calm intensity of the deep blue of the sea to the warm embrace of moss in the forest. The colours of nature transport us into a universe of tranquillity and harmony, giving us moments of pure serenity and contemplation.

In this selection, the sky meets the ocean for a feeling of tranquillity and harmony given by their nuances. From the ocean to the colours of the undergrowth, the palette is enriched with enveloping tones such as the dark green of tree foliage and the lighter green of ground vegetation. These natural colours give a feeling of protection and comfort, creating a serene and regenerating environment for the spirit.

PLEASURE

Neutral colours and warmer shades, pastels and beiges are an elegant and refined choice for any contemporary and refined environment.

PLEASURE offers these delicate and light shades, which add a touch of brightness, creating a cosy and harmonious atmosphere for a pleasant and rewarding visual and sensory experience for the eyes and spirit.

PLEASURE

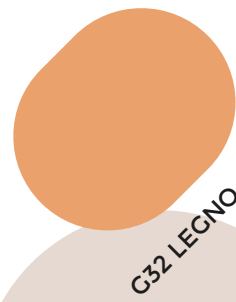

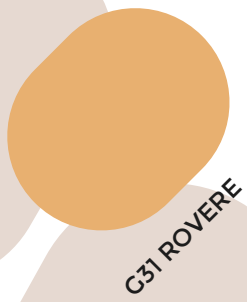

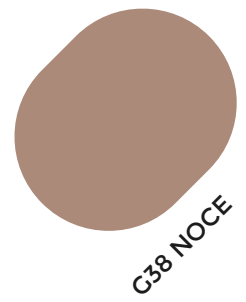

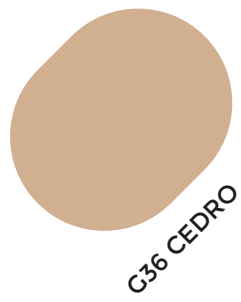

CHILL

The brown hues that recall the earth are perfect for creating a warm and cosy atmosphere inside the home, transforming a simple floor or wall covering into a decorative element that brings tranquillity and wellbeing to the entire environment, perfect for spending pleasant moments of relaxation in the home.

CHILL, with its chromatic richness that conveys a sense of stability and harmony, defines an ideal space to relax and regenerate and to improve the quality of everyday life.

CHILL

HONOR

Honour is the feeling you get when you recognise your own worth and virtue, and has been associated with our darkest and deepest brown tones, which lend solemnity to the environments in which they are used.

HONOR offers a selection of dark tones to bring a feeling of strength to any living environment.

DECORATIVE TECHNOLOGY

FugaStyle's 42 MOOD colours are made with the fine-grained product CEM 1_8, specifically for modern surfaces and decorative elements.

Thanks to the experience gained over decades in the building and construction industry, Grigolin uses a special formulation that prevents and inhibits colour bleaching, acting directly on the formation and presence of efflorescence. It also uses pigments with high homogeneity and intensity, resulting in MOOD palettes capable of enhancing any finish.

CEM 1_8 offers low permeability performance and reduced water absorption, eliminating the risk of lime and salt efflorescence formation. With a plastic consistency and high thixotropy, it remains soft and workable for a long time and without fatigue, for perfect application without subsequent 'draining'. Once dry, the product has an above-average resistance to abrasion and very low stainability of the joints, maintaining long-term colour stability and homogeneity.

FUGASTYLE CEM 1_8

CEMENT GROUT IDEAL FOR CERAMICS, MARBLE AND MOSAICS OF ALL KINDS, IN 42 ELEGANT COLOURS

CEM 1_8 is a grout for 1 to 8 mm joints. It is water-repellent, easy to clean, has excellent workability and high abrasion resistance, and naturally prevents the growth of bacteria, mould and fungi.

- Tiles and stoneware of all types and formats
- Marble
- Natural stones
- Glass mosaic
- Water-repellent
- Prevents the proliferation of bacteria and moulds
- Grouting on heating and cooling screeds
- Sanitizable - Easy cleaning and maintenance
- For interior and exterior use
- For horizontal and vertical surfaces
- Available in 42 colours

FUGASTYLE CEM 1_8

TECHNICAL DATA	VALUE
Appearance	fine powder
Water in the mix	1,3 lt - 5 kg bag (approx. 26%)
Curing time	3 min
Pot life	*2 h
Abrasion resistance	≤ 1000 mm ³
Bending strength after dry storage	6,0 N/mm ²
Bending strength after freezing/thawing cycles	6,0 N/mm ²
Compressive strength after dry storage	30,0 N/mm ²
Compressive strength after freezing/thawing cycles	28,0 N/mm ²
Shrinkage	1,8 mm/m
Water absorption after 30 min	0,3 g
Water absorption after 240 min	0,8 g
Resistance to the growth of bacteria S% (survival)	0%
Degree of mould colonization C% (growth)	no visible growth

TIME TO WAIT BEFORE GROUTING	
Floor with adhesive	*24 hrs
Floor with quick-setting adhesive	*4-6 hrs
Floor with dry-shake finish (mortar)	*8-10 days
Wall with adhesive	*5-6 hrs
Wall with quick setting adhesive	*2 hrs
Ready for use	*7 days
Set to light foot traffic	*24 hrs

*these times refer to a temperature of 23°C-50% R.H.
They become shorter with higher temperatures and longer at lower temperatures.
