

**PALLADIO
CALCECOLOR
color chart**

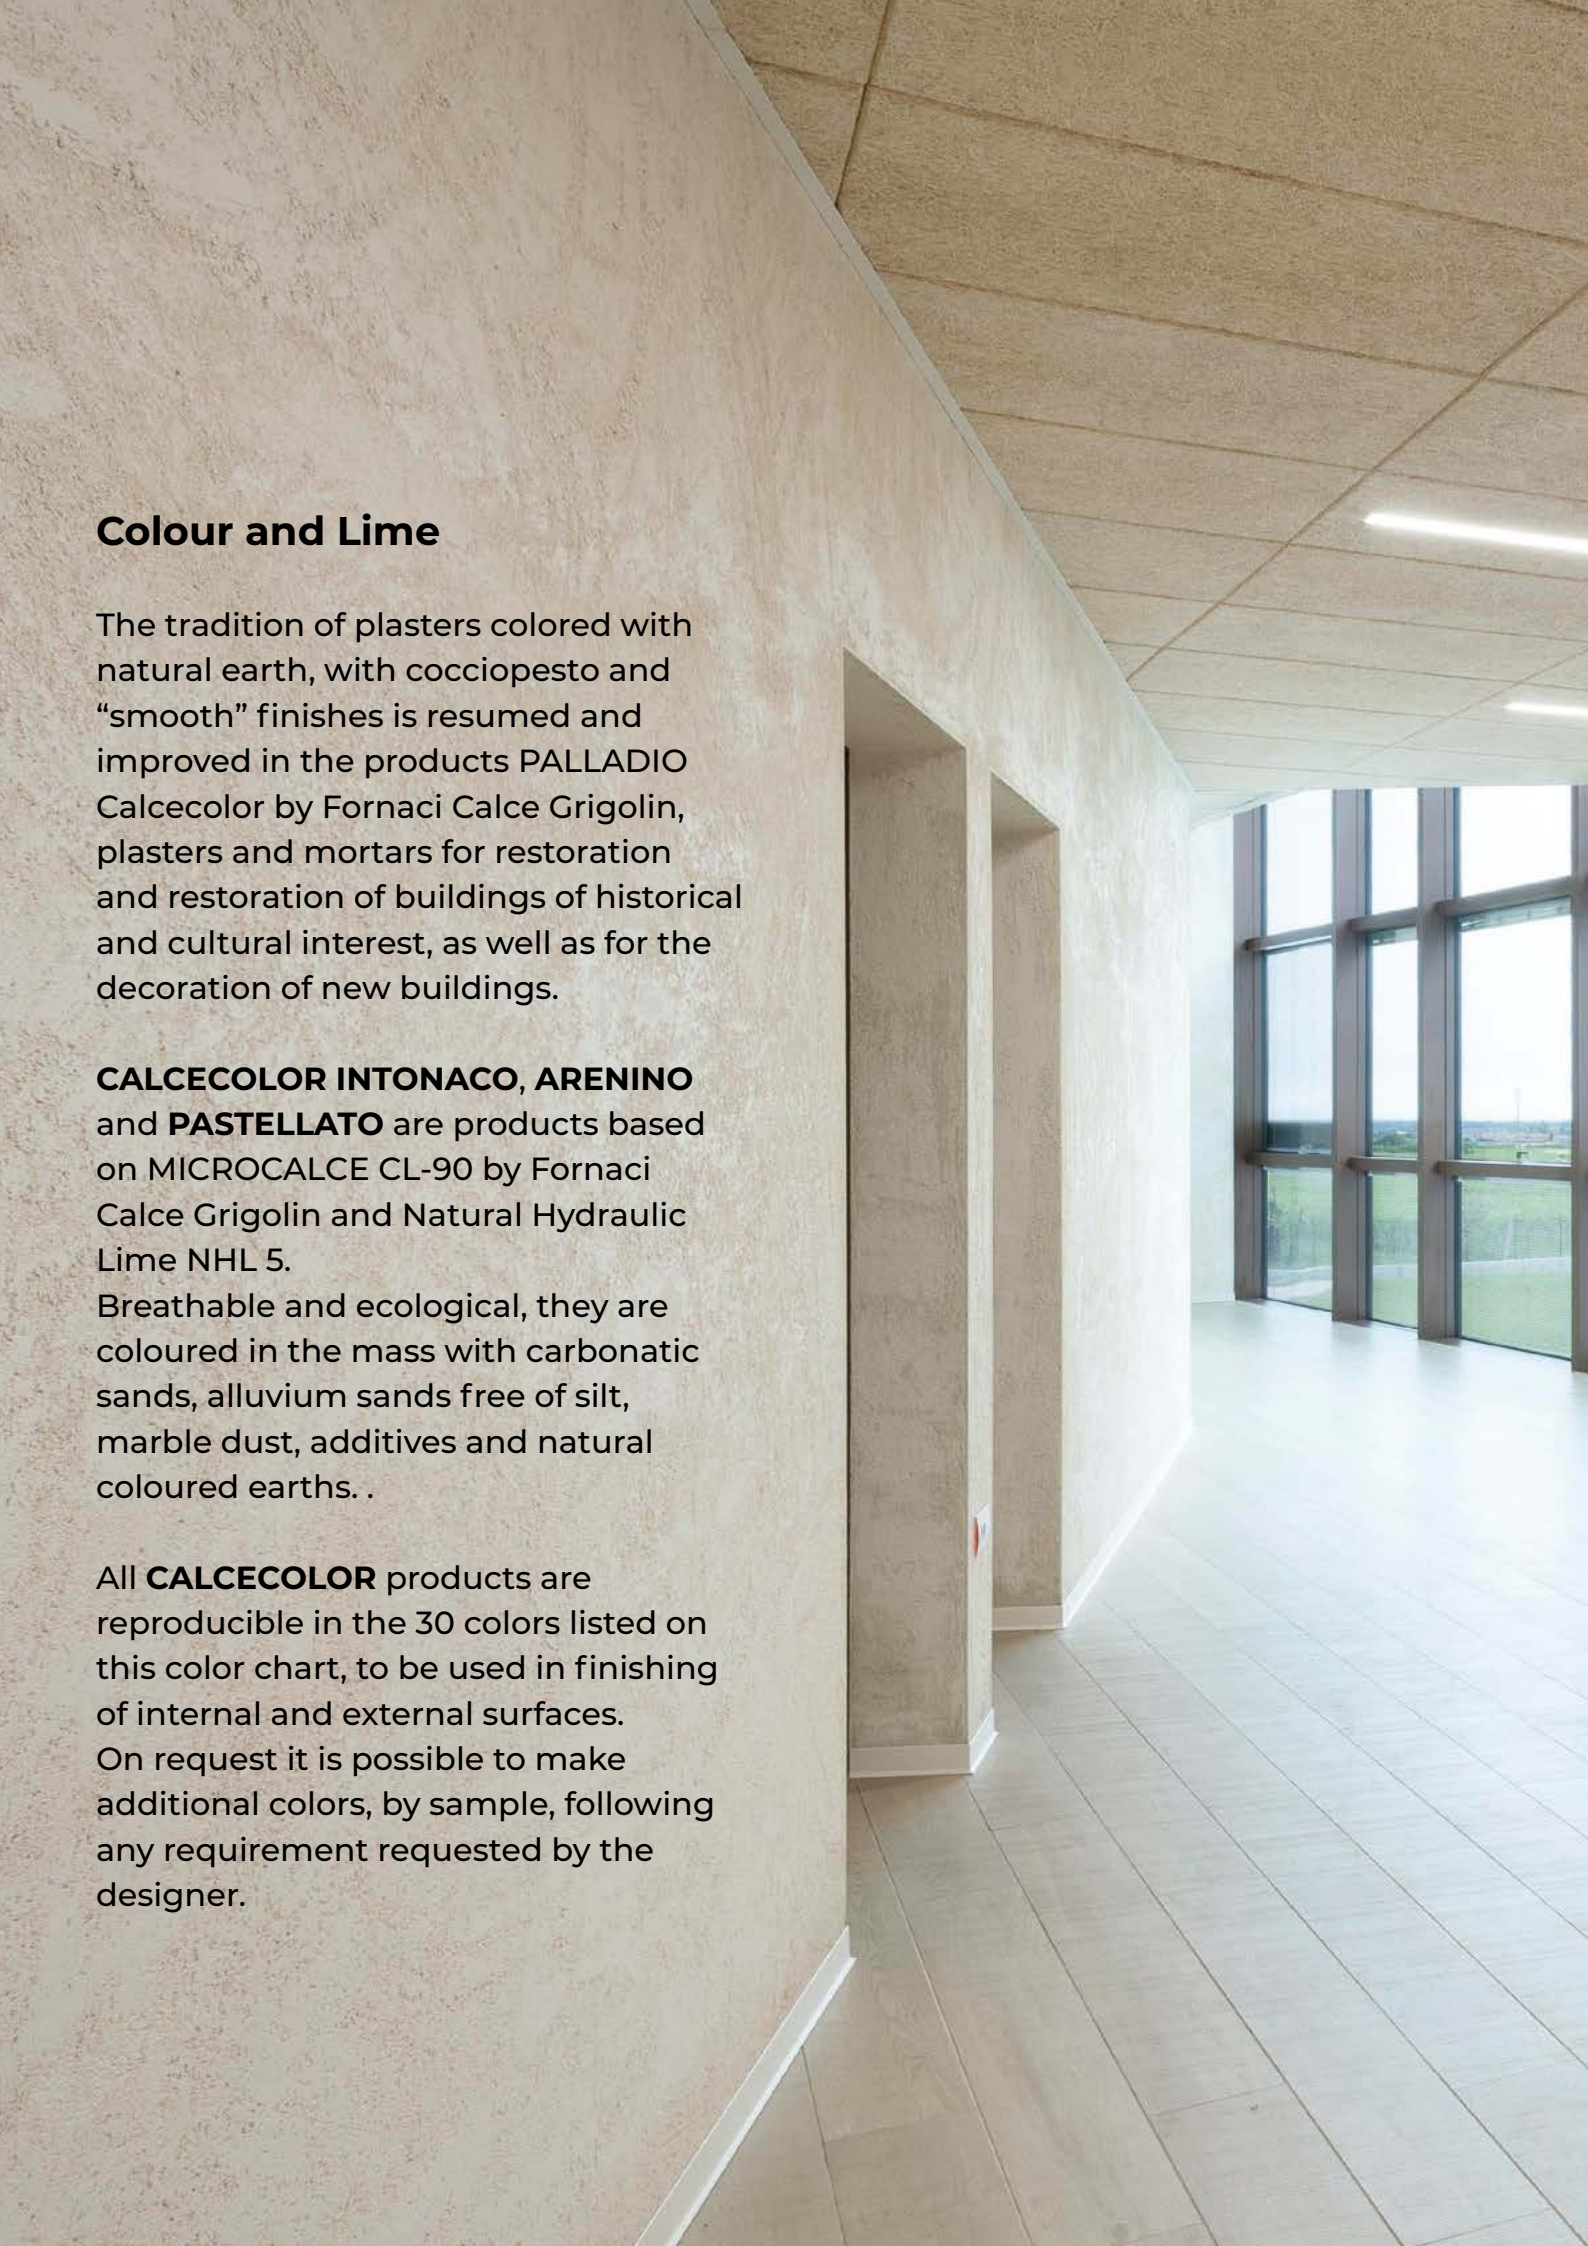

Colour and Lime

The tradition of plasters colored with natural earth, with cocchiopesto and “smooth” finishes is resumed and improved in the products PALLADIO Calcecolor by Fornaci Calce Grigolin, plasters and mortars for restoration and restoration of buildings of historical and cultural interest, as well as for the decoration of new buildings.

CALCECOLOR INTONACO, ARENINO and **PASTELLATO** are products based on MICROCALCE CL-90 by Fornaci Calce Grigolin and Natural Hydraulic Lime NHL 5.

Breathable and ecological, they are coloured in the mass with carbonatic sands, alluvium sands free of silt, marble dust, additives and natural coloured earths. .

All **CALCECOLOR** products are reproducible in the 30 colors listed on this color chart, to be used in finishing of internal and external surfaces. On request it is possible to make additional colors, by sample, following any requirement requested by the designer.
